Initial savings estimate and case studies

Example case study

Case Study: Energy

Energy is a significant and often overlooked area for savings and is critical to carbon footprint, and your carbon footprint is part of your business's carbon footprint. As a critical area for savings, your energy consumption, sustainability reporting requirements and carbon footprint reduction requirements.

Energy Source	Consumption (kWh)	CO2 Emissions (t)	Cost (£)
Electricity	100,000	100	10,000
Gas	50,000	100	5,000
Oil	10,000	100	1,000
Coal	5,000	100	500
Renewable	5,000	100	500
Total	175,000	300	17,000
